

TRẦN HUỲNH TIẾN

Fullstack Developer

tranhuyhntien.work@gmail.com | 0767533227 | Github: [Neit272](#)

EDUCATION

Bachelor of Information Security

Sep 2022 – Present

University of Information Technology – VNUHCM

WORK EXPERIENCES

Frontend Developer Intern

Mar 2026 – May 2026

GENX PK STORY

- Developed and maintained responsive user interfaces using modern frontend technologies, ensuring cross-browser compatibility and smooth user experience.
- Collaborated with designers and backend developers to implement scalable and maintainable web features within agile development workflows.
- Optimized UI performance and improved code quality by following reusable component-based architecture and frontend best practices.
- Contributed to bug fixing, feature enhancement, and testing processes, helping deliver stable and user-focused applications on schedule.

Fullstack Developer Freelance

Aug 2025 – Nov 2025

Euroma Tire

Developed a full-stack business website for a freelance client, handling both frontend and backend work to deliver a professional, responsive, and maintainable web solution. The project included building customer-facing pages, integrating dynamic content management, implementing reusable UI components, and ensuring the site was optimized for performance, accessibility, and a consistent user experience across devices.

PERSONAL PROJECT

Movie Streaming/Comic Reading Web App | [Github](#)

Problem: I needed a unified platform to stream movies and read comics with smooth experience and no ads.

Solution: Built an all-in-one entertainment web app combining movie streaming and comic reading using external APIs.

Tech Stack: React 19, TypeScript, Vite, Tailwind CSS, React Router DOM, Lucide React icons.

SKILLS

Frontend:

React.js, Next.js, TypeScript, Tailwind CSS, HTML5, CSS3

Backend:

Node.js, Express.js, REST APIs

Database:

MongoDB, MySQL, PostgreSQL

Cybersecurity:

Web Security Basics, OWASP Top 10, JWT Authentication, Network Security Fundamentals

Machine Learning:

Python, NumPy, Pandas, Scikit-learn (Basic)

Tools & Platforms:

Git, GitHub, Docker, Linux, Postman
